SKILLS

- Frontend: HTML, CSS, Tailwind CSS, React, Next.js, Remix
- Backend & Cloud: Firebase (Auth, Firestore, Storage, Cloud Functions), Node.js
- Version Control: Git & GitHub
- Other Strengths: Responsive design, writing clean and maintainable code, fast learner, and collaborative

EXPERIENCE

P23 - *Fullstack Developer*

January 2024 - Present

- Worked on various frontend projects, including the development of web apps using React, Tailwind CSS, and Firebase.
- Developed a custom admin dashboard that involved both frontend and backend development. I used Firebase Cloud Functions to implement real-time data processing and integrated Firebase Storage to enable seamless image upload and management.

Mentorship Program - *Frontend Developer*

January 2023 - September 2023

- Completed a 9-month mentorship with a senior developer, learning advanced software development practices, component-driven architecture, and backend integrations.

PROJECTS

Admin Dashboard for Mobile App (P23)

React, Tailwind CSS, Firebase (Auth, Firestore, Storage, Cloud Functions)

- Designed and developed a full-featured admin dashboard for managing content and users of a mobile application.
- Implemented real-time data syncing using Firebase Firestore and Cloud Functions to handle background processing.
- Integrated Firebase Storage for image and file uploads, and built custom UI components using Tailwind CSS.
- Ensured full responsiveness and optimized user experience across devices.

Home Service Marketplace (In Progress)

Remix, Tailwind CSS, Firebase, Node.js

- Building a platform that connects clients with service providers offering household services like cleaning, repairs, and maintenance.
- Responsible for developing both client and worker dashboards, including authentication, user role management, and service filtering.
- Implementing a fully responsive UI using Tailwind CSS, focused on usability across all screen sizes.
- Prioritizing clean UX and intuitive flows for booking, profile creation, and user communication.
