Frontend Developer

I am a frontend developer with over a year of hands-on experience building web and mobile projects. I have learned a lot by working on real-world applications and using modern technologies to make things work smoothly.

I spent 6 months working on a dashboard for a mobile app, where I was responsible for both frontend and backend development. On the frontend, I built out user interfaces and integrated APIs for real-time updates. On the backend, I worked on creating and managing server-side logic, integrating databases, and ensuring smooth communication between the app and the database using technologies like Firebase and Node.js.

Along the way, I had the chance to work closely with a mentor who has over 20 years of experience in the industry, helping me level up my skills and understand the bigger picture in software development.

Skills

- **Frontend**: HTML, CSS, Tailwind CSS, React, Next.js, Remix

- **Backend & Cloud**: Firebase (Auth, Firestore, Storage, Cloud Functions), Node.js

- **Version Control**: Git & GitHub

- **Other Strengths**: Responsive design, writing clean and maintainable code, fast learner, and collaborative

---

Experience

Freelance Frontend Developer

January 2024 - Present

- Worked on various frontend projects, including the development of web apps using React, Tailwind CSS, and Firebase.

- Developed a custom admin dashboard that involved both frontend and backend development. I used Firebase Cloud Functions to implement real-time data processing and integrated Firebase Storage to enable seamless image upload and management.

Mentorship Program

January 2023 - September 2023

- Completed a 9-month mentorship with a senior developer, learning advanced software development practices, component-driven architecture, and backend integrations.

- Worked on a full-stack project in collaboration with the mentor, implementing best practices and coding standards.
